Dead Voters 9
CONCLUSIONS 11

ADDENDUM 1

This report is an addendum to Ohio Votes Count's (OVC) original report on Issues Discovered in Ohio's Statewide Voter Registration System dated February 12, 2022. It presents additional findings in our ongoing Ohio Election Security Project as we continue to research and investigate our Statewide Voter Registration System.

As in our previous report, we use data available for download from the Ohio Secretary of State's (SoS) website. That data is referred to as the statewide voter file, or SWVF. The data is loaded into a Microsoft SQL Server database to handle the large number of records. We continue to use the 11/27/21 data set as the basis for our evaluations. That data is close in time to the November 2021 general election and should be representative of the condition of the database at the time of the election. In the text we include the Structured Query Language (SQL) statements, or close facsimiles to them, we used to extract data from the database. We invite peer review of our work. We are not elections experts and recognize that things that may seem to be abnormal to us may be entirely valid once the circumstances are understood.

Voter Addresses at UPS Stores

Voters must provide a residential address when registering to vote so that their ballot contains the appropriate local candidates and issues for their district. Persons with an invalid residential address cannot be assigned to the proper district.

Ohio Votes Count now has access to advanced data analysis tools that enable us identify the type of building given a street address. A review of a Statewide Voter File from July 28, 2021 identified 138 voters registered at The UPS Store in various locales. For example, the 9 ACTIVE voters are registered at 1130 E MAIN ST in Ashland, Ohio.

SOS VOTERID	County Name	RESIDENTIAL ADDRESS1	RESIDENTIAL SECONDARY ADDR	VOTER STATUS	GENERAL 11_03_2020	GENERAL 11_02_2021
OH0023029221	Ashland	1130 E MAIN ST	STE 304	ACTIVE

Dead Voters

On February 4, 2022, The Ohio Press Network reported that Secretary of State Frank LaRose announced 62 referrals for potential election fraud to prosecutors. In the announcement the SoS stated that 14 deceased individuals potentially voted.

OVC has obtained vital statistics data for the period 2000 through November of 2021. The data includes persons that have died during that period of time. By matching last names, first names, middle initials, and birth dates in the death records with like data in the SWVF we can identify dead persons that remain on Ohio's voter rolls with a high degree of certainty. The Secretary of State would have even more reliable means for identifying dead voters.

OVC used the following query to compare death records to voter registration records.

```
select [Event Year],[FName],[MName],[LName],a.[Suffix],[DOD],[DOB],
       [Res_Address],[Res_Apt],[Res_City],[Res_County],[Res_State],[Res_Zip],
       a.[DECEDANT_ID],b.SOS_VOTERID,b.FIRST_NAME,     b.MIDDLE_NAME,
              b.LAST_NAME,
       b.DATE_OF_BIRTH, c.[County Name] as SWVF_COUNTY, b.REGISTRATION_DATE,
       b.RESIDENTIAL_CITY,
       b.VOTER_STATUS,      b.GENERAL_11_03_2020, b.GENERAL_11_02_2021
from dbo.[Deaths_2000_2021] a inner join dbo.swvf_112721 b on
       a.[DECEDANT_ID]=replace(concat(b.LAST_NAME,left(b.first_name,1),b.date_of_b
       irth),' ','')
       inner join dbo.OH_Counties c on c.County_Number=b.COUNTY_NUMBER
where a.Fname like b.FIRST_NAME
       and (MName=null or left(MName,1) like left(b.middle_name,1))
       and VOTER_STATUS like 'ACTIVE'
       -- optional conditions below
--     and b.REGISTRATION_DATE > DOD
--     and DOD < '2020-10-04' and GENERAL_11_03_2020 like 'X'
--     and DOD < '2021-10-03' and GENERAL_11_02_2021 like 'X'
```

```
order by DOD
```

The query produces the following results using the 11/27/21 data set

- 13,888 voter registrations have matching death records
- 9,624 voter registrations with matching death records have ACTIVE status
- 123 voter registrations with date of death prior to 10/4/20 voted in the Nov 2020 Presidential election.
- 15 voter registrations with date of death prior to 10/3/20 voted in the Nov 2021 general election.

The same analysis on a 2/12/22 data set shows:

- 1,853 voter registrations have matching death records
- 506 voter registrations with matching death records have ACTIVE status
- 118 voter registrations with date of death prior to 10/4/20 voted in the Nov 2020 Presidential election.
- 15 voter registrations with date of death prior to 10/3/20 voted in the Nov 2021 general election.

The table below shows a few examples of vital statistics death records and their matching statewide voter file records.

Vital Statistics Data					SWVF Data						
First	Mid	Last	DOD	DOB	SOS VoterID	First	Mid	Last	DOB	County	Voter Status

DAVID	M	BAKER	5/15/2020	6/8/1965	OH0015591175	DAVID	MICHAEL	BAKER	6/8/1965	Columbiana	ACTIVE

A more than 10,000 deceased voters have been removed since 11/27/21 although several hundred still remain. At the risk of being sour pusses, we believe the voter registration database should be in prime condition PRIOR to an election. Purging of dead voters after an election has little value.

CONCLUSIONS

OVC continues to find real issues in Ohio's voter rolls. Voter registrations with a residence at a commercial business are not valid registrations and should not be permitted. The process for screening and enter addresses into the voter registration database needs to be reviewed and improved upon. An investigation should be performed to determine how UPS addresses came to be included in voter registration data. Procedures and software to prevent entry of commercial addresses should be implemented. We applaud the SoS for discovering dead voters and persons that may have voted on their behalf. However, the voter rolls need additional and consistent scrubbing to entirely eliminate dead voters from the rolls.

OVC will continue to issue addendums to our report as additional data becomes available.
